

This workshop will benefit those with an interest in children and adults with a range of developmental and acquired brain-based learning difficulties and behavioural problems including, but not limited to, learning disabilities, brain injuries, ADD/ADHD, FASD and Autism Spectrum Disorders. This includes: self-advocates, parents, and professionals (teachers, pre-service teachers, social workers, psychologists, SLPs, OTs, PTs, other medical professionals, and support workers).

SARAH WARD, M.S., CCC-SLP

Sarah is Co-director of Cognitive Connections in Concord, MA and co-author of the **360 Thinking** executive function program. She is an internationally recognized expert who regularly presents on the topic of Executive Function. Sarah is dedicated to developing innovative treatment strategies and educating others to understand, care for, and celebrate the learning and behavioural based differences in individuals with brain-based learning differences.

This training (offered in English, with simultaneous French translation and handouts available in both official languages) will re-energize your work. You will leave with fresh new Executive Function (EF) strategies to engage even your most challenging clients.

Objectives:

1. Determine clearly the nature of executive function and how these skills impact self-regulation and task completion.
2. Integrate the theory and techniques of Ward's *360 Thinking* model into your home, school, or clinical setting.
3. Incorporate EF skills into individual and group settings.
4. Designate three steps to create an environment for developing self-regulation and executive control.
5. Generate a framework of interventions for ways to sense and manage the passage of time.
6. Describe strategies to develop capacity to read a room and be a "mental time traveler" to pre-experience the physical actions to complete a task in time and space.
7. Learn the "Get Ready, Do, Done" Model for long term and complex assignments.
8. Strengthen the parent-professional team for supporting students with EF challenges.
9. Learn ways to educate others on the relationship between self-regulation and EF.
10. Add proven techniques and interventions to your toolbox.
